ADIR GAMIL

Fullstack & Frontend Developer

2000adir2000@gmail.com | 052-699-9581 | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

SUMMARY

Full Stack / Frontend Developer with a passion for building scalable, real-time web applications using React, Redux, Node.js, and MongoDB.

Built and launched AniZone, a live social platform with thousands of registered users, featuring user profiles, watchlists, live blog content, and a custom-built CRM system for admins.

Also developed StayFlex, an end-to-end booking app inspired by Airbnb, featuring responsive UX and real-time functionality.

IDF Intelligence Corps veteran with security clearance.

EXPERIENCE

Frontend Developer - Selected   **Jul 2024 - Present**

- Developing and maintaining custom websites using PHP, JavaScript, HTML, and CSS (including custom WordPress code), focusing on clean, optimized, and scalable development.
- Contributing to a closed-source company platform, developing new features and enhancing existing systems.
- Conducting QA and load testing, and providing technical support for clients post-deployment.
- Collaborating with design teams to implement responsive, pixel-perfect websites, while handling server-side logic and integrations in PHP when needed.

AniZone MERN Stack Application   **Nov 2024 - Present**

- Built and launched AniZone, a social platform for anime fans using React, Redux, Node.js, MongoDB, and TailwindCSS.
- Implemented real-time updates with WebSockets and integrated Firebase Auth and AWS SES for notifications and email services.
- Developed a custom CRM for admin role management, moderation, and analytics.
- Reached 6,500+ registered users.
- **Live**

StayFlex Web Application   **Jul 2024 - Sep 2024**

- Developed StayFlex, a fullstack booking app inspired by Airbnb using React, Redux, Node.js, and MongoDB.
- Led the UI design, implemented real-time updates with WebSockets, and managed the project from concept to deployment.
- **Live** | **GitHub Repository**

EDUCATION

Coding Academy Israel   **May 2024 - Sep 2024**

Fullstack Development Bootcamp

- 640-hour intensive program by Coding Academy Israel, founded by Yaron Biton, co-developer of MAMRAM's programming course and CTO of Mr. Bit. Focused on JavaScript, React, Vue.js, Node.js, and MongoDB, emphasizing teamwork and real-world projects.

KEY SKILLS

- **JavaScript & TypeScript**
- **React.js, Next.js, Redux, TanStack Query**
- **Node.js, Express.js, MongoDB**
- **Vue.js & Angular**
- **AWS (SES), Docker**
- **Coolify (self-hosted CI/CD), Linux VPS (Hetzner)**

- **RESTful APIs, WebSockets**
- **Git & GitHub**
- **TailwindCSS, SASS / SCSS**
- **Firebase (Auth & Firestore)**
- **Authentication (JWT, bcrypt)**
- **Pixel-perfect UI (Figma to React), Framer Motion**
